Bubble Roll

Bubble Rolls is undisputedly known for its reliable performance in material packing all over the globe. With a longer service life they protect sensitive devices from both physical and static damage. Bubble rolls are lightweight, commercial friendly, and effective in protecting against shock, abrasion and vibration. Based on the bubble size dimension, they are used to pack light weight to sensitive items. Small bubble is best suited for small and light weight items. Medium bubble provides a combination of surface protection, shock absorption and void fill. Large bubble material is mainly used as pack material by filling the void space.

Corrugated Roll

Corrugated rolls are used as per the packing needs of the clients in all the industrial verticals. Low manufacturing cost makes corrugated roll affordable for every customers around the world. Being light weight these rolls are easily the hygienic and efficient way of packaging. Based on length and size, these rolls are made cost effective with the client specifications. With the manufacturing hubs located near various industrial belts, the quality quantity and specifications are met as per client needs. Used to pack all range of materials, the corrugated rolls are easy to trade with the availability of the extensive trading sources available around the globe.

PRODUCTS

PP Strap

Polypropylene Straps and bands are called PP straps and PP bands. Made from plastic, steel, paper, or fabric, PP Straps secure items during shipping or storage. Hand-made or machine-made, PP Straps made of polypropylene are suitable for securing lightweight bundles, boxes, cases, parcels and palletized loads. PP Straps and bands are additionally secured either manually or automatically using machines manufactured especially for this purpose. Straps in steel are designed for heavier, palletized loads; plywood cases and wooden crates; and sharp-edged objects. Stainless steel strap and bands are also corrosion-resistant. Straps and bands made out of polyester are called PET strap. Pet Straps are much cheaper and rust resistance when compared to stainless steel strap and bands.

Thermocool Sheet & Box

Packing solutions become incomplete without the most basic packing material of Thermocool. Thermocool packaging material including sheets and blocks are exclusive, eco-friendly and cheap. They are also most extensively used for insulation in residences, showrooms and offices. Since the material is lightweight, eco-friendly it enables easy transportation for packaging of glass, medicinal, cookware, electronic and automobile components. Compatibility with the other packing and sealants, thermocol ranks unbeatable usability and value for money for all possible industries. Customization in sizes and different density also becomes a marketing advantage in the mass usage of the Thermocol.

PRODUCTS

PP Sack (Cargo Packing) – All size

Cargo packing is incomplete without the tailor made PP Sacks i.e., polypropylene woven bags and HDPE woven bags etc. These bags are specially designed for ruggedness, safety and leak-proof packaging of products. Such PP sacks are extensively used around the globe for the cargo packing of food grains, plastics & polymer products, sugar, cement, salt, fertilizer, chemical, pharmaceutical, textile, Bale Coverings and Sand too. Other areas of use of Jumbo Bags and Woven Sacks and woven polymer are Liners, protective irrigation system, canal liners, Automobile covers etc

Carton Box (Plain, Printed) - All size

Various types of corrugated boxes are used for domestic and export. As general packing carton box, gift boxes, box printing, paper boxes and also as partition corrugated cartons, wooden pallets in both domestic and export packaging. Available in options of full overlap, semi overlap, duplex and handicraft boxes, paper conductive packaging box, these carton boxes find usage in all the packing needs..

Jumbo cartons and Inner cartons are also manufactured with the same quality to match the international packaging standards of quality, weight and size dimensions. For food and oil industries, printed cartons are made in single, two colour, tri colour, multicolour duplex printing with customer's varied specifications and designs.

PRODUCTS

Stretch Film (Clear, Black)

Stretch wrap or stretch film is wrapped around items. The elastic property of the stretch film keeps the items tightly bound. Available in types of bundling stretch film, hand stretch film, extended core stretch film, machine stretch film and static dissipative film, the most common stretch film/wrap material is linear low-density polyethylene or LLDPE. With properties of high breakage strength, cling, clarity, tear resistance, static discharge helps in stability of products or packages, efficient storage and dust and moisture protection. Manual (or Hand) Wrappers, Semi-Automatic Wrappers, Automatic Wrappers, Hand Films, Machine Films, Specialty films based on colors, UVI and silage. Colors options of clear and black are availed to packing solutions based on customer needs.
